Mission and Mandates

MISSION STATEMENT

The International Joint Commission prevents and resolves disputes between the United States of America and Canada under the 1909 Boundary Waters Treaty and pursues the common good of both countries as an independent and objective advisor to the two governments.

In particular, the IJC rules upon applications for approval of projects affecting boundary or transboundary waters and may regulate the operation of these projects; it assists the two countries in the protection of the transboundary environment, including the implementation of the Great Lakes Water Quality Agreement and the improvement of transboundary air quality; and it alerts the governments to emerging issues along the boundary that may give rise to bilateral disputes.

Lower the Water Levels

WHY LEARN RESOURCES TAKE ACTION

WHY IS THE WATER SO HIGH?

Current River levels are approximately 15" higher than at the same time last year!

Plan – 2014 vs 1958

Lower the Water Levels

WHY LEARN RESOURCES TAKE ACTION

WHAT'S HAPPENED

PLAN 2014 vs PLAN 1958

Understanding Plan 2014, Lake Ontario water levels and the risk to Municipalities and home owners from United Shoreline Ontario

The map shows the Lake Ontario - St. Lawrence River Drainage Basin. Key features include the Moses Saunders Dam, Ottawa River, St. Lawrence River, and various locations like Trois Rivières, Montreal, Ottawa, Cornwall, Kingston, Toronto, and Buffalo. The map also shows the international border between Canada and the USA, and the drainage basins of the Upper and Lower Rivers. A legend indicates the international border and drainage basins. A scale bar shows 0, 20, 40, 60, 80, 100, 120 Kilometers. An inset map shows the study area within the Great Lakes region.

Understanding Plan 2014

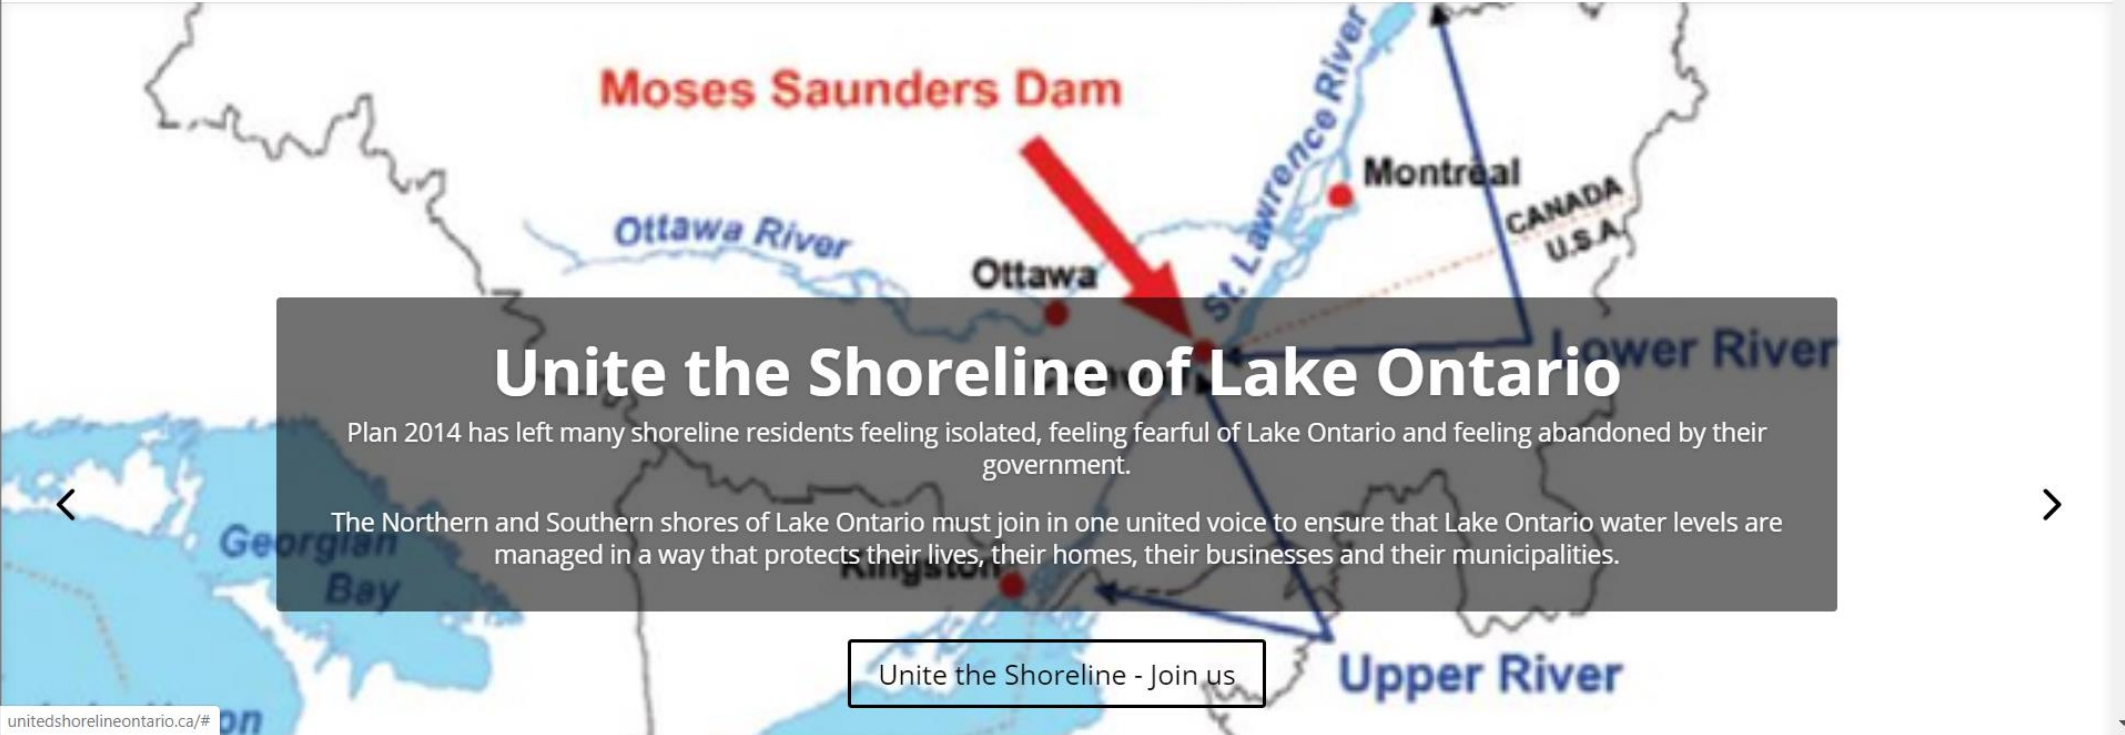

What lakeshore families, businesses and municipalities need to know.

Unite the Shoreline of Lake Ontario

Plan 2014 has left many shoreline residents feeling isolated, feeling fearful of Lake Ontario and feeling abandoned by their government.

The Northern and Southern shores of Lake Ontario must join in one united voice to ensure that Lake Ontario water levels are managed in a way that protects their lives, their homes, their businesses and their municipalities.
